STATINTL

Dear Ralph:

I was delighted to have your invitation to your international colloquium and delighted to hear of your own central involvement therein. In truth, I have not been in genuine scientific work for the last two years. Furthermore, I am afraid that my present responsibility in the Government would preclude my going to Moscow in June.

I am sure that you will have a splendid conference, and I shall look forward to seeing a summary of the results.

Sincerely,

"S"

Albert D. Wheelon
